

Jaime Pesca

Data Scientist | Machine Learning, Business Analytics and Operations Research
Colombia | +57 300 657 2416 | Jaime.e.pesca.s@gmail.com

SUMMARY

Data scientist with end to end experience across descriptive, predictive and prescriptive analytics. I build machine learning models, executive dashboards and large-scale optimization models, and turn the results into concrete business decisions. I have led projects and technical teams in manufacturing, banking, consulting and tech, with measurable results in customer retention, scheduling, logistics and digital growth.

TECHNICAL SKILLS

- **Machine Learning and Statistics:** predictive modeling, churn and classification, segmentation and cohort analysis, discrete choice (random utility) modeling, design of experiments and A/B testing, statistical analysis and inference.
- **Data Visualization and BI:** Power BI (data modeling, DAX, executive reporting) and Looker Studio. Executive dashboard design, data storytelling and reporting automation.
- **Data and Digital Analytics:** SQL, Python data pipelines, ETL and automation, GA4 and GTM, measurement and attribution frameworks, conversion funnel modeling.
- **Optimization and Operations Research:** MILP, MINLP, large-scale combinatorial optimization, constraint modeling, heuristics and metaheuristics, model benchmarking. Gurobi, GAMS, PuLP.
- **Programming and Tools:** Python, R, SQL, Git, Jupyter, advanced Excel.
- **Languages:** English (C1, IELTS 7.0), Spanish (native).

PROFESSIONAL EXPERIENCE

Senior Data Scientist (Consultant)

Sep 2025 to May 2026

Overlap, Remote

- Directed and supervised machine learning projects end to end across descriptive, predictive and prescriptive analytics for enterprise clients.
- Designed decision and optimization models for enterprise-level business problems, and translated analytical findings into strategic recommendations for executive leadership.
- Defined metrics, dashboards and executive visualizations that allowed clients to monitor performance and support decisions with data.
- Coordinated multidisciplinary technical teams and client stakeholders on engagements for BBVA, BCP, Alicorp, Primax, Claro, Banco Agrario and Banco Santander.
- Delivered optimization and experimentation workshops for Claro Colombia's senior analytics leadership.

Senior Data Scientist, Growth and Media

Mar 2025 to May 2026

XAQ10, Remote, USA

- Designed data-driven performance optimization systems, applying experimentation and funnel modeling to improve conversion.
- Built measurement and attribution frameworks (GA4 and GTM) and ran advanced segmentation and cohort analysis.
- Automated executive dashboards and recurring reporting, cutting manual analysis work and speeding up decision making.
- Partnered with engineering and UX teams to move analytical findings into product.

Growth Specialist (Consultant)

Feb 2025 to May 2025

Dataico, Remote, Colombia

- Designed and deployed machine learning models for customer churn prediction, identifying at-risk segments to inform retention strategies.
- Built automated Python data pipelines and Metabase dashboards for analytics, reporting and model deployment.

Marketing Data Analyst

Sep 2023 to Oct 2024

Tradeview Markets, Remote

- Built performance dashboards and multichannel attribution frameworks for campaign tracking.
- Ran audience segmentation and behavioral analysis to improve media spend efficiency.

Optimization and Continuous Improvement Analyst

Dec 2022 to Jun 2023

Coca-Cola FEMSA, Tocancipa, Colombia

- Designed and implemented a large-scale Mixed Integer Programming workforce scheduling model integrating production capacity, labor constraints and demand variability, moving planning from heuristic allocation to mathematically optimized scheduling.
- Led cross-functional Lean Six Sigma continuous improvement projects and built data-driven decision tools for production management.
- Collaborated with engineering, operations and HR teams to operationalize optimization results and improve resource allocation.

EDUCATION

M.S. in Applied Analytics, Universidad de La Sabana

Jun 2023 to Feb 2026

Distinction. Full merit research fellowship (100%).

Graduate Certificate in Logistics and Supply Chain Management, MIT

May 2025 to Feb 2026

50% merit scholarship.

B.S. in Industrial Engineering, Universidad de La Sabana

Jan 2018 to Jun 2022

Professional Certificate in Data Science and Analytics, MIT xPRO

Apr 2023 to Nov 2023
